

Focus on what matters

The finance leader's guide to
on-demand staffing

weploy™

What is on-demand staffing?

On demand staffing gives organisations and business leaders the ability to hire quality contract workers for as little as four hours only when the need arises.

For finance leaders, this flexibility allows teams to improve productivity, as repetitive or manual heavy lifting can be outsourced.

In the new world, it is not the big fish which eats the small fish, it's the fast fish which eats the slow fish.

Klaus Schwab

Executive Chairman, World Economic Forum

Finance teams spend
about a day each week
on admin tasks

Increasing productivity through outsourcing admin

Finance leaders and their teams typically spend long hours attending to manual tasks, increasing the risk of errors and preventing them from focusing on more strategic work that drives profitability.

There is a unique opportunity for finance leaders to reduce the burden on their teams by outsourcing finance admin. This not only increases team productivity but also employee engagement.
